

AWARENESS TRAINING ON ISO 14001:2015

DURATION

TRAINING OBJECTIVES

To build awareness and develop competence among personnel in understanding and implementing the key principles and requirements of ISO 14001:2015 Environmental Management System. The training aims to equip participants with practical knowledge to identify, evaluate, and manage environmental aspects and impacts within their work areas. It provides essential understanding of compliance obligations, operational controls, and continual improvement processes, enabling individuals and teams to contribute effectively toward environmental performance, pollution prevention, and sustainability objectives of the organization.

COURSE CONTENT

- Overview of ISO Standards & ISO 14001
- Introduction to EMS principles
- Key requirements and structure of ISO 14001:2015
- Identifying environmental aspects and impacts
- Setting environmental objectives and operational controls
- Implementation roadmap of ISO 14001
- Benefits of EMS in improving sustainability and compliance
- Continual improvement for enhanced environmental performance

LEARNING OUTCOME

- Understand the purpose, structure, and key requirements of ISO 14001:2015.
- Identify environmental aspects, impacts, and relevant compliance obligations.
- Recognize the steps for implementing and maintaining an effective EMS.
- Appreciate the organizational and environmental benefits of ISO 14001 implementation.
- Contribute to continual improvement and sustainable environmental performance.
