

# WORKSHOP ON BEHAVIOUR-BASED SAFETY (BBS)

## DURATION

## TRAINING OBJECTIVES

To build awareness and develop competence among employees in understanding the principles and practical application of BBS. The training aims to enhance proactive safety culture by focusing on safe behaviours, hazard recognition, and risk reduction at the workplace. It equips participants with knowledge to identify unsafe acts, encourage positive safety behaviours, conduct effective safety observations, and contribute toward incident prevention. The program promotes individual accountability, teamwork, and continuous improvement in occupational health and safety performance.

## COURSE CONTENT

- Introduction to Behaviour-Based Safety (BBS)
- Concept and evolution of BBS
- Difference between unsafe acts and unsafe conditions
- Principles of human behaviour and safety culture
- ABC Model (Antecedent - Behaviour - Consequence)
- Identifying critical safety behaviours
- Conducting safety observations and reporting
- Positive reinforcement and feedback techniques
- Role of leadership and employee participation in BBS
- Measuring and improving safety performance through BBS
- Benefits of implementing BBS in the organization

## LEARNING OUTCOME

Listed below are some of the benefits of attaining BBS Workshop:

- Understand the concept, principles, and importance of Behaviour-Based Safety.
- Identify unsafe behaviours and promote safe work practices.
- Apply the ABC model to analyze workplace behaviours.
- Conduct effective safety observations and provide constructive feedback.
- Contribute actively to building a proactive and sustainable safety culture.
- Support continual improvement in workplace safety and incident prevention.

## CERTIFICATE

A Complementary Certificate Will be provided upon submission of Google review.
